## Housekeeping & Carpet Cleaning

### ROTOVAC CARPET RESTORATION

#### How it Works

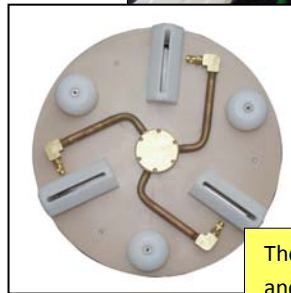

Rotovac is an alternative to our Standard Wand service, and is used for deep cleaning your carpet, and restoring carpet that is badly damaged. It runs on the same high-powered truck mount that our standard cleaning equipment uses.

Where the wand works similarly to a vacuum cleaner, the Rotovac is more like a buffer and a vacuum combined. Instead of a stationary head like the wand, Rotovac has a rapidly oscillating head (1500 multi-directional cleaning passes per minute) with three sets of hot water jets and intakes.

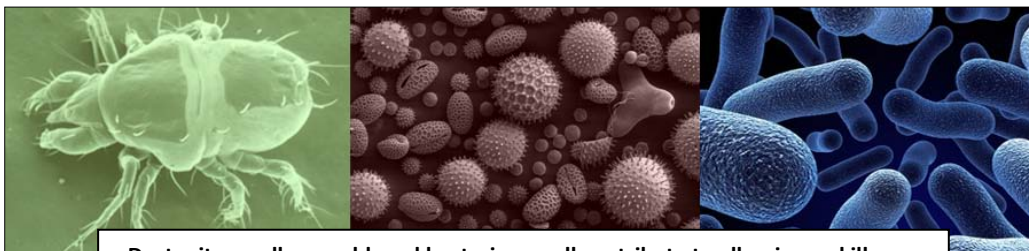

This allows the water to penetrate much more deeply into the carpet, dislodging stubborn, ground-in dirt. Without using any brushes, the head glides over your carpet in a circular motion, restoring your carpet's thread memory and lifting the pile, which leaves your carpet clean, fresh, beautiful, and looking like new.

#### How Much Difference Does it Really Make?

Wand cleaning does work; the wand pulls dirt and debris from your carpet with hot enough water to sterilize contaminants, and using a very powerful vacuum intake, leaves your carpet clean and fresh. However, because the Rotovac oscillates so quickly and pushes several jets of water into your carpet simultaneously from multiple angles, it is able to vigorously agitate the pile of your carpet, cleaning at a much greater depth and dislodging ground-in soil that a wand just cannot remove with its more basic vacuum-like function.

The Rotovac 360's oscillating head features three jets and three water intakes, and is powered by our top-of-the-line Boxxer truck mounted engine.

Dust mites, pollen, mold, and bacteria can all contribute to allergies and illness.

Especially if you're **troubled with allergies, have immune system deficiency**, or are simply concerned with taking the utmost care in preserving and extending the life of your carpet, this extra deep cleaning power can make a big difference.

## The Proof is in the Pile

We recently pulled and restored a badly damaged section of carpet from a client's house to see just how well the Rotovac really cleans.

### Before Cleaning

The carpet had spots ranging from burn marks to motor oil, to ground in food, dirt, and very heavy traffic marks. We pretreated the carpet with standard cleaning solution as we would do with any normally soiled rug, and also added spot treatment to several of the darker spots.

**Halfway through**, we can already see a noticeable difference. We will add additional spot treatment to the trouble areas before we're done and give them another pass.

**SECOND PASS:** With the exception of the burn marks, most of the spots the carpet had initially are gone. Even the motor oil is almost imperceptible (*left*).

## The final result is gorgeous, clean, rejuvenated carpet.

**If Rotovac can restore this carpet,  
imagine what it can do in *your* home.**
